Speech Recognition
Solutions

Dolbey provides accurate and reliable speech recognition for any healthcare specialty. Discover the solution that would work best for you.

The Fusion Suite™

DOLBEY
— SINCE 1914 —

Dolbey Speech Recognition Options

Our suite of products can help you accomplish your speech recognition goals.

- On-premise
- Cloud-based
- Desktop
- Mobile
- Front-end SR
- Back-end SR
- Radiology-specific
- General purpose

Dolbey offers front-end and back-end speech recognition options, as well as premise-based and cloud-based speech recognition solutions.

Whether you want a full transcription report with finalized documents, or the ability to use speech recognition to enter information directly into an EHR, or to automate keystrokes and clicks with your voice, or if you have any other speech recognition need – you can accomplish it with Dolbey's speech recognition products.

At Dolbey, we also have an incredible support team for each of our speech recognition products. We work around the clock every day to make sure you have the tools you and your team need to be successful.

Dolbey has been named Best in KLAS or KLAS Category Leader for speech recognition categories in 2012, 2013, 2014, 2015/2016, 2018, 2019 & 2021.

Cloud-based speech recognition that is as flexible as it is functional - **One-click download**

Fusion Narrate Dx
Dictate the patient story, self-edit the narrative, sign and complete - **Get it right the first time**

Transcription
Fusion Narrate Text
Send recognized narrative for editing - **Dictate however you want**

Fusion Narrate

Document your patient's story right the first time.

- ✔ Wireless microphone for iOS and Android
- ✔ No on-site servers, web-based download
- ✔ Application virtualization (Citrix and VMware support)

- ✔ Accuracy optimization service (AOS)
- ✔ Customizable vocabulary and substitutions
- ✔ Built-in medical specialty dictionaries

Fusion Narrate® powered by nVoq™ is a cloud-based speech recognition solution with exceptional accuracy. You can use your desktop, iPhone® or iPad® to dictate directly into any application. Simplify the documentation workflow with Dolbey's flexible features, including Fusion Narrate CAPD™ and the shortcut builder. With the Fusion Narrate shortcut builder, you can easily configure voice commands to automate keystrokes, macros, and web browser actions. Fusion Narrate also has over 100 built-in voice commands to make EHR navigation and data entry effortless.

A quick web-based download lets you access Fusion Narrate in the cloud from your computer. Enhance your workflow and rely on the service and stability Dolbey has provided for over a century to attain the efficiency and productivity your healthcare organization demands.

- **Web-based user administration**
- **On-screen controls for touch-screen devices**
- **More accurate, context-based speech recognition through recurrent neural network technology**
- **Automatic software updates available**
- **Dictation mode with back-end speech and Fusion Narrate Text™ transcription integration**
- **Advanced select and say navigation ('No Connector' requirements)**
- **Generative AI and Browser Automation shortcut capability**
- **Compatibility and configurable buttons with SpeechMike, PowerMic, Olympus® microphones**
- **Web-based usage reports**

Fusion Narrate Dx

Front-end Speech Recognition for Radiology

Fusion Narrate Dx™ powered by nVoq™ allows radiologists, cardiologists, and other emergency and general clinicians to make timely, accurate reports. Fusion Narrate Dx also allows each user to set their own workflow options and allows administrators to build custom reports to pull data. With its unparalleled accuracy and flexibility, Fusion Narrate Dx enables healthcare providers to easily capture and analyze data, streamline workflows, increase efficiency, and maximize revenue potential.

Fusion DocCheck™ increases the power of Fusion Narrate Dx by identifying possible inconsistencies, spelling errors, grammar errors, or formatting errors. It comes with a radiology-specific dictionary and rule set, so common issues with radiology reporting will be recognized. This rule set is configurable, so facilities can decide which rules should be active and can create new rules specific to their needs. With the power of Fusion Narrate Dx and Fusion DocCheck, you'll begin to see more accurate and timely diagnostic reports right out of the gate.

Fusion Narrate Text

Transcription and Editing

Dolbey transcription software is recognized as the industry leader for its state-of-the-art features, exceptional support, and high degree of customer satisfaction. Fusion Narrate Text is a highly customizable and completely integrated transcription solution for every healthcare document management system. Easily manage reports from dictation to signature and distribution to final document archival.

Fusion Narrate Text allows teams to extend in-house functionality to remote workers with ease while maintaining control. Key components of Fusion Narrate Text, including speed typing, customized formats, medical spell checking and stored routines, enable transcription/editing teams to work faster and easier with greater precision than ever before. Fusion Narrate Text is designed with ease-of-use in mind, and is easy to learn for all transcription staff. Integration with patient registration, demographics and order systems eliminates redundancy while ensuring the integrity of the data as it is passed from Fusion Narrate Text to your Health Information System or EMR.

What is the Fusion Suite?

Whatever your environment, whatever your need – we have a solution that fits. Dolbey offers premise-based and cloud-based speech recognition solutions. We also offer desktop and mobile options, as well as front-end and back-end speech recognition products.

With Fusion Narrate, you can insert speech-recognized text into any application. With Fusion Narrate Dx, you can take advantage of radiology-specific features, such as combining recognized speech with external data in real-time to build comprehensive diagnostics reports. With Fusion Narrate Text, you can transcribe and manage reports with exceptional efficiency. Dolbey Fusion Suite products can meet your speech recognition needs.

You can experience more accurate documentation, healthier patients and better revenue cycle with Dolbey.

Since 1914, Dolbey has provided voice recording and document management solutions designed to help healthcare organizations improve workflow, boost productivity and increase profitability.

The Fusion Suite platform is Dolbey's line of award-winning software products that includes dictation, transcription, speech recognition, clinical documentation improvement, and computer-assisted coding technologies. Together they deliver an end-to-end solution that creates more accurate reporting for critical data and improves documentation, reimbursement, and patient care.
