Dictation, Transcription, Speech Recognition, Computer-Assisted Coding & CDI Solutions
Speech Recognition
Radiology Solutions

Solutions that return measurable and tangible results for your investment.

The Fusion Suite™

DOLBEY
— SINCE 1914 —

What is
the Fusion Suite?

Dolbey's award-winning healthcare suite of solutions improve productivity while delivering better documentation which improves patient care. Dolbey offers a suite of accurate and customizable speech recognition, dictation, transcription, digital recording, CAC, and CDI solutions with reliable support. Our healthcare solutions have been at the forefront since 1914.

You can experience more accurate documentation, healthier patients and better revenue cycle with Dolbey.

Fusion Narrate Dx

Superior image reporting and customized workflows

✔ Radiology-specific speech content

✔ Custom interface support

✔ Highlight and queue incomplete dictation reports

✔ Report prioritization

✔ Single user profile for all locations

✔ Fully customizable user-generated templates

Fusion Narrate Dx™ powered by nVoq™ is a powerful, flexible speech recognition solution that accommodates a variety of workflows and integrations. Fusion Narrate Dx enables physicians to deliver timely, quality diagnostic reports while providing comprehensive data capture and analytics.

Fusion Narrate Dx is specifically created to meet the rigorous demands of radiology reporting. Its flexible design, focused radiology speech lexicon and data integration capabilities enable the creation of highly efficient workflows tailored to meet the needs of any radiology department.

Fusion Narrate Dx performs an acoustical and statistical analysis for each provider, leading to incredible accuracy. The speech engine recognizes and adapts to different pronunciations and identifies and analyzes patterns in the way the provider speaks to more accurately recognize speech.

With a single speech license, Fusion Narrate Dx can accommodate the provider who prefers real-time speech recognition and self-editing, along with the user who wants to utilize the productivity of transcription assisted editing.

Fusion Narrate Dx was named Best in KLAS in 2021 for the Speech Recognition: Front-End Imaging category.

- **Integration with PACS, RIS, EHR - no special interface needed**
- **Voice record into any text field**
- **Insert linked routines while recording**
- **Grammar check and spell check functionality**
- **Extensive foot pedal and microphone support**
- **Mobile dictation**
- **Low bandwidth**
- **Customizable transcription options**
- **Enhanced workflow options for critical findings, resident workflows, dual reads, and peer review**

Integrations

Fusion Narrate Dx offers multiple options for bringing external data and diagnostic content into your reports. This data can be inserted in real-time or added to a paused report at your convenience. Dolbey has partnered with numerous vendors to improve radiology workflows and increase productivity and satisfaction for providers.

- **ACR Assist** - Support the Imaging 3.0 initiative with ACR's structured clinical guidance that allows content to be naturally incorporated into the radiology workflow.
- **External Data Integrations** - Import radiation dosage, DICOM, ultrasound information or other exam-related data from another system directly into your radiology report. Eliminate the need to dictate these values and ensure accuracy.
- **RSNA templates** - Access and utilize RSNA reporting templates directly.
- **StatDx** - Review Diagnostic Decision Support for Radiology with this integration.
- **Web Reference Material** - View commonly used websites and content like YottaLook, Bosniak Classification and Fleischner Criteria while in the report for diagnostic assistance.

Enhanced Quality

Whether you are looking to stay ahead of regulatory efforts or simply searching for a solution to improve the overall quality of your reporting, Fusion Narrate Dx offers several options to achieve your goals.

- **Fusion DocCheck™** - Identify inconsistencies, missing data, conflicting findings and more at the time of documentation, ensuring that your document is accurate from the start.
- **Dual Reads for Mammography** - Fulfill requirements set by the FDA and for MQSA inspections by implementing our solution to consult other radiologists for agreement on mammography reports or suspend a report for a second radiologist to review before marking the report final.
- **Critical Finding Reporting** - Find and collect data on reports with critical findings to ensure compliance with your organization and The Joint Commission.
- **Critical Finding Follow-up Trigger Words and Phrases** - Communicate critical findings immediately to other providers based on certain trigger words and phrases set by your facility.

Since 1914, Dolbey has provided voice recording and document management solutions designed to help healthcare organizations improve workflow, boost productivity and increase profitability.

The Fusion Suite platform is Dolbey's line of award-winning software products that includes dictation, transcription, speech recognition, clinical documentation improvement and computer-assisted coding technologies. Together they deliver an end-to-end solution that creates more accurate reporting for critical data elements and improves documentation, reimbursement and patient care.
