Fusion Narrate and ExpertPath

Speech Recognition for Anatomic and Clinical Pathology Decision Support

Formulate Your Differential Diagnosis **More Efficiently**

ExpertPath from Elsevier is an anatomic and clinical pathology online decision support system that quickly provides clinical and diagnostic information, guided by recognized pathology experts, to aid in formulating differential diagnoses. Fusion Narrate allows users to quickly access and interact with ExpertPath through custom voice commands.

Together, Fusion Narrate and ExpertPath enable more efficient and accessible decision support for pathologists, lab technicians, and other healthcare providers in clinical environments. Speech recognition and voice commands through Fusion Narrate make it possible to dictate within an LIS, then easily reference and navigate ExpertPath hands-free.

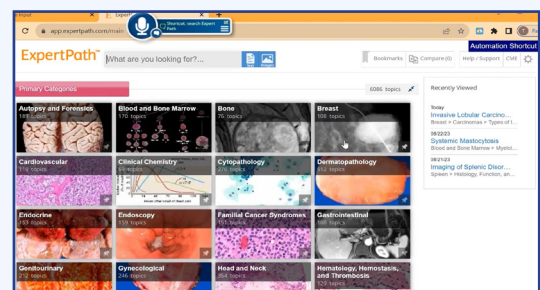

- ✓ Quickly reference ExpertPath for decision support with the use of Fusion Narrate voice commands.
- ✓ End your workday earlier with an integrated, voice-controlled pathology decision support system.
- ✓ Never lose your place when dictating or referencing ExpertPath through the Fusion Narrate screen lock feature.

Access and Navigate ExpertPath **With Your Voice**

Fusion Narrate makes it easy to search ExpertPath with a single voice command.

By highlighting a term within a case in the LIS and using the 'Search ExpertPath' voice shortcut, users can instantly navigate from the LIS to the ExpertPath search results for that term.

Then, easily jump to sections of the full reference document such as Microscopic or Reporting, enlarge the image, or claim CME without ever clicking a button or using the keyboard with Fusion Narrate voice commands.

ExpertPath can be entirely navigated with Fusion Narrate voice commands, including **'Search ExpertPath'** and document navigation commands such as **'Microscopic'**.
