Fusion Narrate ACI

Ambient Speech Recognition

Capture the full patient visit in real-time.

Fusion Narrate ACI™ generates a complete patient report by simply recording the patient visit. Fusion Narrate ACI combines the latest advancements in natural language processing with the proven intuitive and customizable Fusion Narrate® powered by nVoq™ client to enable seamless real-time transcription and analysis of multi-party conversations.

After recording a patient visit with the Fusion Narrate Recorder mobile application, a full transcript and report are generated and delivered to the Fusion Narrate encounter list for review on a workstation. The report can then be transferred in full or by section to any EHR or target application with Fusion Narrate ACI Quick Transfer.
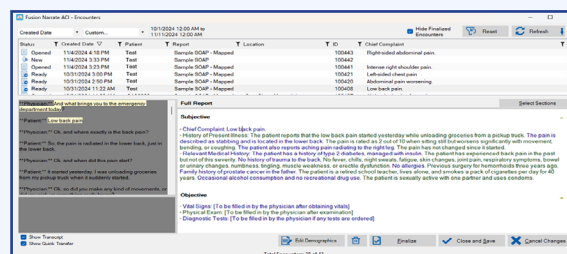

Key Features

- ✔ Automated documentation for patient visits
- ✔ Several methods to transfer text to the EHR
- ✔ Seamless mobile-to-desktop transfer
- ✔ Real-time transcription
- ✔ Workflow routing of audio, transcript, and draft reports with administrative Service Console

Review and Transfer Patient Encounter Notes

Fusion Narrate ACI makes it easy to review recently generated reports and transcripts for patient encounters.

Built-in voice commands can be used to navigate and edit the report. Sections of the report can be reworded to include more detail or made more succinct with a single click.

Paired with Quick Transfer, Fusion Narrate ACI offers providers enhanced workflow automation and significantly improved efficiency.

View the full transcript of a patient encounter side-by-side with the generated report. Clicking on any term within the report will automatically navigate to the section where it was discussed within the transcript.
